- Preparing for Christmas caroling by our girls' students in the month of December.

Good Thot:

Honeycomb givers

There are three kinds of givers, the flint, the sponge and the honeycomb. Which kind are you? To get anything from the flint, you must hammer it. Yet, all you generally get are chips and sparks. The flint gives nothing away if it can help it, an even then only with a great display.

To get anything from the sponge, you must squeeze it. It readily yields to pressure, and the more it is pressed, the more it gives. Still, one must push.

To get anything from the honeycomb, however one must only take what freely flows from it. It gives its sweetness generously ripping on all without pressure, without begging or badgering. Note too, that there is another difference in the honeycomb. It is a renewable resource. Unlike the flint or the sponge, the honeycomb is connected to life; it is the product of the ongoing work and creative energy of bees.

If you are a "honeycomb giver" your life will be continually replenished and grow as you give. And as long as you are connected to the source of all life, you can never run dry. When you give freely you will receive in like manner, so that whatever you give away will soon be multiplied back to you.

"Make one person happy each day and in 40 years you will have made 14,600 human beings happy for a little time at least."-Charley Willey

"Be the change that you wish to see in the world."-Mahatma Gandhi

"Only he who attempts the ridiculous can achieve the impossible" -DBB

"Once you start working on something, don't be afraid of failure and don't abandon it. People who work sincerely are the happiest."-Chanakya
